I tend to see patients who live out with the CWP patch and occasionally have patients that are known to CWP but these are clients that I would not be involved with in my NHS capacity. Any patients that I work with know that I work for the NHS and that this is my primary job and that if my role with CWP changed and there was a potential conflict of interest I would no longer be able to see them privately. My manager is kept up to date of my private working arrangements.	12/03/2018
