### **REPORT BRIEFING**

# **Situation** – a concise statement of the purpose of this report

This report details the ward daily staffing levels during the month of September 2016 following the submission of the planned and actual hours of both registered nurses (RN) and clinical support workers (CSWs) to UNIFY (appendix 1). The themes arising within these monthly submissions continue to mirror those that have arisen previously. These themes identify how patient safety is being maintained on a shift by shift basis.

Background – contextual and background information pertinent to the situation/ purpose of the report

The monthly reporting of daily staffing levels is a requirement of NHS England and the National Quality Board in order to appraise the Board and the public of staffing levels within in-patient units. CWP undertook a comprehensive review of ward staffing levels between Oct and Dec 2013 with 6 monthly follow up reviews, the most recent of which has been submitted to Operations Board in July 2016 and to Board of Directors in July 2016. A number of recommendations were made within the latest six monthly report including consistency checking, national benchmarking, and widening the consideration of the MDT role within safer staffing. These recommendations are currently being followed through and monitored via the Safer Staffing group led by the Associate Director of Nursing [MH and LD] and will be reported on in the next 6 monthly report.

## Assessment – analysis and considerations of options and risks

During September 2016 the trust achieved staffing levels of 96% for registered nurses and 95.1% for clinical support workers on day shifts and 94.9% and 98% respectively on nights.

Where 100% fill rate was not achieved patient safety on in-patient wards was maintained by nurses working additional unplanned hours, cross covering across wards, the multi-disciplinary team and ward manager supporting nursing staff in the delivery of planned care and patient care being prioritised over non-direct care activities. Appendix 1 details how wards, who did not achieve overall staffing of 95%, maintained patient safety.

Recommendation – what action/recommendation is needed, what needs to happen and by when?

The Board of Directors are recommended to note the report.
