

10 components of Positive Behaviour Support

BILD 2019 based on Gore et al (2013)

1 Feeling valued and included increases Quality of Life and reduces behaviours of concern.

2 Caregivers are trained and supported by a scaffolding approach to building skills.

3 Everyone contributes to the whole process from start to review & ongoing

4 Behaviours serve a function! There is always a good reason behind a behaviour.

5 Understanding behaviour supports us to support behaviour change

6 PBS Interventions have a good evidence base

7 Information is used at every stage

8 Understanding the behaviour helps to work out the action

9 Proactive = changes behaviour
Reactive = manages behaviour

10 Evaluate everything as you go along and over the long term
